SUMMARY

Second-year CSE student (Data Science & AI, IBM Partnership) at Integral University with a **9.80/10.00 CGPA**, ranked **2nd out of 79 teams** at Smart India Hackathon 2025 (Internal Edition). Skilled in full-stack web development (React.js, JavaScript, Python) and AI-integrated application design. Seeking an internship to apply hands-on product development experience in a professional setting.

EDUCATION

Integral University

B.Tech – Computer Science and Engineering, Data Science and AI (IBM Partnership)

Lucknow, Uttar Pradesh, India

Aug 2024 – Aug 2028 (Expected)

- **CGPA: 9.80 / 10.00** (Top of cohort, till Semester 3)
- Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Artificial Intelligence, Machine Learning, Cloud Computing

La Martinere College

Higher Secondary Education (Class XII)

Lucknow, Uttar Pradesh, India

Apr 2010 – Apr 2024

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, HTML5, CSS3, SQL, Java

Frameworks & Libraries: React.js, Bootstrap 5, Tailwind CSS, jQuery

Developer Tools: Git, GitHub, VS Code, Chrome DevTools, CLI, Git Bash

Cloud & Databases: Google Cloud Platform (GCP), AppSheet, Looker, MySQL

Methodologies & Soft Skills: Agile Development, Responsive Web Design, Team Leadership, Cross-functional Collaboration, Problem Solving

EXPERIENCE

Team Leader – Smart India Hackathon 2025 (Internal Edition)

Sep 2025

Team CODEVATIVE, Integral University, Lucknow

- Led a 6-member cross-functional team to design and ship *Manayush*, a full-stack mental health platform, winning **2nd place out of 79 teams** under MoE Innovation Cell and AICTE.
- Drove end-to-end product delivery: system architecture, UI/UX design, front-end and back-end development, and live demo to a judging panel — all within a hackathon timeline.
- Coordinated agile sprints, delegated tasks across design and development tracks, and ensured iterative delivery under time constraints.

Self-Directed Full-Stack Developer

Aug 2024 – Present

Integral University, Lucknow

- Built and deployed personal projects using React.js, Tailwind CSS, and vanilla JavaScript beyond coursework, focusing on performance and code maintainability.
- Earned Google Cloud skill badges in GCP Compute, AI Prompt Engineering (Vertex AI), and Data Visualization — demonstrating proactive upskilling in cloud technologies.

PROJECTS

Manayush – Full-Stack Mental Health Platform | JavaScript, HTML5, CSS3, AI Integration

Sep 2025

- Architected a mental wellness web app featuring AI-powered emotional support chat, real-time mood tracking, mindfulness modules, and encrypted counselor booking.
- Built a multilingual, WCAG-accessible interface with mobile-first responsive design; applied secure user authentication and privacy-first data handling.
- **Impact:** Secured 2nd place at SIH 2025 (Internal) — validated by MoE Innovation Cell and AICTE judges as a production-ready concept.

Personal Portfolio Website | HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Git

2024 – 2025

- Engineered a fully responsive, mobile-first portfolio with semantic HTML5, Tailwind CSS utility classes, and zero UI framework dependencies.
- Implemented interactive components via vanilla JavaScript DOM manipulation; maintained structured Git branching with clean commit history on GitHub.
